

**J** +1 305-496-6100

### Education

Duke University

August 2022 - May 2024

Master of Engineering in Electrical and Computer Engineering(Software Track)

Durham, U.S.

University of Miami

August 2018 - May 2022

Bachelor of Science in Computer Science

Miami, U.S.

#### Technical Skills

Programming Language: Java, Python, C/C++, SQL, HTML, JavaScript, CSS, Verilog;

Technology/Framework: JSP, JDBC, Servlet, SpringBoot;

Developer Tool: Git, VSCode, IntelliJ IDEA, Markdown, LaTex, Tomcat, JUnit, Jira;

**Domain Knowledge:** Database System, Computer Networking, Operating System, Linux, Software Testing.

Experience

## Mevion Medical System | Software Engineer Intern

May 2023 - August 2023

- Constructed an intuitive interface with a split layout: On the left, a rendering window displayed over 5000 STL files, accompanied by 10 interactive features including model highlighting, hiding, and resetting, as well as the ability to display PDFs for individual models(Python, PyQt, VTK);
- Integrated the langehain-chatglm project from Tsinghua University on the right side, deploying the chatglm2-6b model as a question-answering system. Developed a server to retrieve answers and utilized socket connections for question and response transfer. Implemented multi-threading for fetching model responses, ensuring optimal application performance. The system can answer over 10 questions simultaneously in a single query(**Python**);
- Participated in an enterprise-level software development process: utilizing Jira for project management, conducting software testing, addressing departmental feedback, and debugging. Achieved a 95% satisfaction rate upon releasing the software to over 500 employees. Built the groundwork for future collaborations with outsourcing partners on knowledge graph projects.

## Projects

#### RISC game | Java-based PvP game

February 2023 - May 2023

- Followed S.O.L.I.D principles in designing UML diagrams and applied object-oriented programming concepts in Java to implement all the logic for the RISC game. Used Jira for team task deployment and ensured a 100% test coverage after the completion of preliminary logic code;
- Followed the MVC architecture for file development and management, and implemented WebSocket Communication between the Client and Server within the SpringBoot framework. Developed the game's GUI, supporting a at least 4 players online simultaneously;
- Implemented registration/login and an online chatroom feature using SpringBoot, and thoroughly tested the developed functionality using **PostMan**.

Malloc and Free | C language-based memory allocation system

January 2023

- Implemented malloc() and free() functions using the **best-fit method**, utilizing the **sbrk()** function for memory allocation. Created a doubly-linkedlist to represent memory blocks and maintained a freelist to track all available memory blocks;
- To minimize memory wastage, implemented memory block coalescing and splitting. Employed Valgrind for testing and employed mutex locks to protect critical sections that might be accessed concurrently by multiple threads.

# Leadership / Extracurricular

## Computer Science Department

August 2021 – December 2021

Teaching Assistant

University of Miami

- Served as a Teaching Assistant for Java Fundamentals and Python Fundamentals courses, collectively overseeing a cohort of over 200 students;
- Responded to student inquiries via email, providing prompt and comprehensive answers to their questions;
- Graded student assignments and examinations. Achieved a student satisfaction rate exceeding 90%.

## 教育经历

杜克大学

2022/08 - 2024/05

美国,达勒姆

电子与计算机工程硕士 (软件开发) **迈阿密大学** 

2018/08 - 2022/05

计算机科学学士

, 美国, 迈阿密

# 专业技能

编程语言: Java, Python, C/C++, SQL, HTML, JavaScript, CSS, Verilog;

JavaWeb: 熟悉 JSP、Servlet、JDBC 等知识, 熟练使用 Tomcat + Eclipse 开发 Web 项目;

框架: 熟悉 Springboot,参与项目开发并贡献的功能有: 登陆/注册,群聊聊天室;

工具: 熟练使用 Git 并保持使用 Github 管理个人资料。熟悉 Markdown 以及 LaTex 文件的语法;

专业知识: 熟悉数据库、计算机网络、操作系统、Linux 系统等知识, 熟悉软件测试 (JUnit 等) 知识。

## 实习经历

迈胜医疗设备有限公司 | 软件工程师实习生

2023/05 - 2023/08

- 开发了**独立的软件**: 展示公司机器设备的**所有 3D 模型文件** + 基于公司文档的 **AI 知识库问答系统**。该软件遵守**企业级开发流程**: 前期评估与汇报,实现代码和测试,后期撰写说明书和**面向公司发布**。该软件获得了 **100% 的好评率**并为公司未来**知识图谱合作**奠定基础;
- 实现了一个渲染窗口,展示了**超过 5000 个** STL 文件,并伴随着 **10 种**交互功能,包括模型高亮、隐藏和重置,显示单个模型的 PDF 文件等。用户可以随意调整模型的角度,放大/缩小来更直观地了解公司生产的设备(Python, Qt, VTK);
- 引入了**清华大学的 langchain-chatglm 项目**, 部署了 chatglm2-6b 模型作为问答系统。开发了一个**服务端** 来获取答案,并利用 **WebSocket** 连接进行问题和响应的传输。实现了**多线程**来获取模型响应,确保应用程序的最佳性能。(**Python**)。

## 项目经历

个人网站 | 基于 HTML, CSS, JavaScript 的个人网站

2023/10

- 为了确保网站清晰度,使用了**响应式设计**来适配手机端。使用了 **flexbox** 来设计布局,如.home-section, .experience-content 等,确保了各个内容部分在页面上的清晰合理分布和对齐;
- 为了给用户提供视觉反馈和丰富的互动体验,使用 data-aos 属性来控制页面元素的动画效果,使页面内容 在滚动时有**动态效果展现**。设计了**八个按钮**并提供了**点击悬停效果**,每个按钮在鼠标悬停时都有独特的动 画和对应的功能。

RISC 游戏 | 基于 Java/SpringBoot 的 PvP 游戏

2023/04 - 2023/05

- 遵循了 **S.O.L.I.D 原则**来设计 **UML 图表**,并在 Java 中应用了**面向对象编程**概念来实现 RISC 游戏的所有逻辑。使用 Jira 进行团队任务部署,并确保在初步逻辑代码完成后实现了 **100% 的测试覆盖率**;
- 遵循了 MVC 架构进行文件的开发和管理,并在 SpringBoot 框架内实现了客户端和服务器之间的 WebSocket 通信。开发了游戏的图形用户界面,支持至少 4 名玩家同时在线;
- 使用 SpringBoot 实现了注册/登录功能和一个在线聊天室功能,并使用 PostMan 测试了开发的功能。

Malloc 和 Free | 基于 C 语言的内存分配项目

2023/01 - 2023/02

- 使用**最佳匹配方法**实现了 malloc() 和 free() 函数,利用 sbrk() 函数进行内存分配。创建了一个**双向链表** 来表示内存块,并维护了一个链表来跟踪所有可用的内存块;
- 为了最小化内存浪费,实现了内存块的**合并和分割**。使用 Valgrind 进行测试,并使用**互斥锁**保护可能被多个线程并发访问的关键部分。

# 课外经历

迈阿密大学计算机部门 | 学生助教

2021/08 - 2021/12

- 担任 Java 基础课和 Python 基础课的学生助教, 课程总计有超过 200 位学生;
- 答疑学生的课业问题, 期末期间平均一天回复 10 封邮件;
- 批改学生的考试和作业、给出合理的评分。学生好评率达 95%。
